The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Únit: 1624

DETAILED ACTION

1. Claims 1-24 and 26-36 are pending in this application.

Restriction/Election

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3 (in part), 5 (in part), 6-8, and 9-13 (in part), drawn to pyrazino[2,1-c][1,2,4]triazines (see TABLE 2), classified in class 544, subclasses 236 and 256.
 - II. Claims 1-3 (in part), 5 (in part) and 9-13 (in part), drawn to [1,2,4]triazolo[4,5-A]pyrazines (see TABLE 3), classified in class 544, subclass 350.
 - III. Claims 1-3 (in part), 4 and 9-13 (in part), drawn to others, classified in class 540 and 544, subclass various.
 - IV. Claims 14-15, drawn to library compounds, classified in class 435, subclass 4.
 - V. Claims 16-24 and 26-36, drawn to a method for carrying out a binding assay, a method for inhibiting, treating or preventing tumor growth; a method for treating or preventing restenosis, kidney disease, angiogenesis, rheumatoid arthritis, ulcerative colitis, tuberous sclerosis complex (TSC) or KSHV associated tumor, classified in class 514, subclass various.

Art Unit: 1624

The inventions are distinct, each from the other because of the following reasons: Groups I-IV are directed to structurally dissimilar compounds such that the variable core created by the varying definitions of G, E, and D in formula I do not belong to the same recognized class of chemical compounds in the art, and references anticipating one invention, would not render obvious the others. For example, Group I are drawn to [4,4,0] reverse-turn mimetic compounds (diazines fused to a 6-memberd ring) and is different from Groups II-III. Group II is drawn to [4,3,0] reverse-turn mimetic compounds (azoles fused to a 6-memberd ring) and is different from Groups I and III. Group III is drawn to others (e.g. [5,4,0] reverse-turn mimetic) and is different from Groups I-II. Group IV is different from Groups I-III, since it is drawn to library of compounds. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structure equivalents of each other.

Inventions I-III and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the productas claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the pyrazino[2,1-c][1,2,4]triazines compounds are used as antiviral that is materially different process using the product.

Art Unit: 1624

If Group III or V is elected; election of a single disclosed species is required.

If applicants elect, Group III, IV or V, further restriction maybe required.

Because these inventions are distinct for the reasons given above and have acquired separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Rejoinder

3. The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. Process claims that depend from or otherwise include all the limitations of the patentable product will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is

Art Unit: 1624

found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

A telephone call was made to Ms. Qing Lin on May 15, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kahsay Habte, Ph. D. whose telephone number is (571) 272-0667. The examiner can normally be reached on M-F (9.00AM- 5:30PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Wilson (Acting SPE) can be reached at (571) 272-0661. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
